

Overview

AWT6841 is AeroWindTech's provides quality Cork & Rubber tape formulated to meet the physical requirements of MIL-T-6841 and AMS-T-6841 standards and is dual certified for the transportation industry.

AWT6841 Cork Tape covers tape and sheet manufactured for windshield panels, windows, and structural panels in commercial and military aircraft. Non-staining, non-crazing, non-fogging, with a buffed surface AMS/Mil-T-6841 conforms in every way to the specification requirements.

Benefits

Our AWT6841 Cork rubber tape is an excellent seal, great choice for a shim and under most conditions, acts as a bi-metallic insulator. It also provides non-skid properties and is made of sponged synthetic cork and rubber with non-stretch print cloth vulcanized to the material. The ground finish on Cork Tape gives an attractive appearance. Also, the close tolerance of this material expands the uses and applications of this product.

Aircraft require the highest quality parts able to withstand the most challenging conditions from weather exposure to temperature extremes and exposure to oils and gases. Your aircraft also needs to be able to protect traveling assets from the elements. Our AWT6841 Cork Tape will meet and exceed those requirements.

Size Options

AWT6841 is produced in thicknesses ranging from 1/32" to 1/8" thick. We have the capability to supply this product in a 36" wide roll or slit to width Rolls to your desired requirement as narrow as 1/4" wide.
