

**Overview**

AWT950 is AeroWindTech's Industrial Grade Durable Urethane Table Cover which is ideal for Cutting Surfaces within the composite clean room and layup area where flat cutting and working surfaces are required. The cutting surface has a smooth surface to work with so not to injure hands or damage product being worked with. Our high-quality and robust composition cutting pads are produced standard as silicone free products.

**Benefits**

- Prevents Contamination
- Smooth working surface
- Reduces possibility of hand injury
- Reduces ability to damage product being worked with
