PROTEX 20VS

USES: **PROTEX 20VS** is a 20 mil latex saturated paper used to protect acrylic windows, canopies and windshields, as well as bare metals and painted surfaces. The paper is vinyl coated on one side and will withstand more abrasion than comparable papers. **PROTEX 20VS** has been manufactured to meet rigid specifications of the aircraft industry.

One of the advantages to **PROTEX 20VS** adhesive system is that if the adhesive-coated side of the paper comes into contact with itself (e.g. if the paper is folded), the product will not block. The two surfaces can be pulled apart without the adhesive being pulled off the paper backing on either side. This will prevent having to dispose of any unusable product.

This product is not intended for fly-away applications.

DO NOT USE ON COPPER, BRASS, OR ANODIZED ALUMINUM, OUTDOOR EXPOSURE IS NOT RECOMMENDED WITHOUT PRIOR TESTING.

TYPICAL PROPERTIES:

BACKING:

Basis wt., lbs./3,000 sq. ft.	175 - 187
Thickness, mils	19 - 23
Tensile strength, lbs./inch, M.D.	24.2 min.
Elongation, % M.D.	3.0 min.
Elmendorf Tear, grams, MD	229 min.

ADHESIVE:

Base	Acrylic
Adhesion to steel, oz./in. width (At time of manufacture)	25 - 35 (-5/+7)
PSTC-1 (Modified)	

STORAGE: Shelf life is 1 year if stored in a cool dry place, out of direct sunlight.

STOCK ROLL SIZES:

36" X 60 YRDS

48" X 60 YRDS
