

Protex 8216-2L

Protects windows and plastic surfaces such as doors, tackle storage units, sink covers, tray tables, cabin molding, dive platforms, etc. during installation, shipment and painting. **Liner allows for die-cutting or hand-cutting masks to required size. Solvent and heat resistance properties. Capable of withstanding outdoor exposure.*

Protex 50

Protects various metals and painted surfaces such as the hull from damage caused by scratches during maintenance. **Self-wound for ease of use in machine application to flat surfaces.*

Protex 223 series

Protects against corrosion and works as a moisture barrier for galley, lavatory and deck box areas. Also provides excellent protection to windows during stripping operations as it exhibits good solvent resistance. **Liner allows the product to be die-cut if desired.*

Protex 20V

Provides heavy duty protection of wood interiors, acrylic windows, canopies, windshields and certain metal and painted surfaces where high abrasion resistance is required.

Protex 8209

Provides abrasion protection on a variety of surfaces including metals, glass, painted surfaces, and due to its flexibility to conform to complex curves is ideal for protecting fabric and leather seats during manufacturing and maintenance.
